Introducing

StarSafe
SIMPLE | EASY | SORTED

A practical digital Health & Safety platform for real kiwi workplaces

Managing Health & Safety documentation shouldn't slow your business down.
StarSafe is a New Zealand-developed platform designed to help businesses manage Health & Safety systems in a clear, structured, and practical way.

It replaces paperwork, scattered documents, and disconnected systems with one simple digital workspace.

WHAT STARSAFE HELPS BUSINESSES MANAGE

StarSafe allows teams to manage everyday Health & Safety processes directly from their phone or computer.

Typical features include:

- Hazard and risk reporting
- Incident and near-miss reporting
- Site inductions
- Toolbox meeting records
- Site sign-ins and worker tracking
- Safety inspections and checklists
- Compliance documentation and reporting.

Everything is recorded and stored in one place.

WHY BUSINESSES USE STARSAFE

Most Health & Safety systems fail because they are too complicated or disconnected from daily work.

StarSafe is designed to be:

Practical

Built for real workplaces including trades, construction and field teams.

Easy to Use

Simple tools that staff can use on site without complex training.

Structured

Clear reporting and documentation that supports compliance and accountability.

HOW IT WORKS WITH YOUR HEALTH & SAFETY CONSULTANT

Your Health & Safety consultant remains your primary advisor.
They continue to provide:

- guidance on compliance and legislation
- system design and documentation
- risk management advice
- ongoing support for your business

StarSafe simply provides the digital platform that supports those systems.

WANT TO SEE HOW IT WORKS?

Your consultant can walk you through the system and explain how it could support your business.
Most businesses start with a simple rollout and expand from there.
